Re: Deadline Extension -- Draft Jorgensen Forge Outfall Site - Corrugated Metal Pipe Workplan - Third Modification for the Administrative Order on Consent for Removal Action, CERCLA DOCKET NO. 10-2011-0017, Jorgensen Forge Outfall Early Action Area, Lower Duwamish Waterway Superfund Site, Seattle, Washington

Dear Mr. Dyer and Mr. Ernst:

Based on outcomes of recent meetings, EPA is satisfied that remaining issues surrounding the Draft Corrective Measures Workplan are resolvable, particularly regarding sidewall sampling. As stated in EPA's comments that were emailed Dec 18<sup>th</sup>, 2015, EPA concurs that no side wall sampling is possible and further concurs that the lateral extent of the site is pre-defined. From discussions with Boeing and Jorgensen, EPA is also comfortable that the Respondents understand the requirement that a decision tree analysis is necessary in defining the vertical limits of contamination that would need to be chased, during Stage 2 of the JFOS cleanup.

Based on these comment resolution discussions, EPA expects a revised CMP workplan within 15 days upon receipt of this letter. Given the holidays, the next version of the workplan needs to be submitted by COB January 19<sup>th</sup>, 2016 to EPA.

Failure to adhere to this schedule extension, could be considered by EPA as non-compliance by the Respondents with Section XVIII of the original Administrative Order on Consent for Removal Action for the Jorgensen Forge Outfall Site and could potentially subject the Respondents to Stipulated Penalties.
